#### HYPOTNS

During the time frame from (computer to display sepresdt/seprestm - 6 hours) to (computer to display sepresdt/seprestm + 6 hours) is there documentation initial hypotension was present? Criteria for determining initial hypotension:

- Two hypotensive blood pressure readings at different times within specified timeframe
  - o systolic blood pressures <90, or
  - o mean arterial pressures (MAP), <65 or o a decrease in systolic BP by >40 mm/Hg
- 1. Yes
- 2. No or unable to determine

### **HYPOTNSDT / HYPOTNSTM**

Enter the date and time on which initial hypotension was present during the time frame from (computer to display sepresdt/seprestm - 6 hours) to (computer to display sepresdt/seprestm + 6 hours).

## CRYSTL

During the timeframe from [(If hypotns = 1, and sepshk = 2, computer to display hypotnsdt/hypotnstm - 6 hours) to (hypotnsdt/hypotnstm + 3 hours) OR (If hypotns = 2 and sepshk = 1 computer to display sepshkdt/sepshktm - 6 hours) to (sepshkdt/sepshktm + 3 hours) OR (if hypotns = 1 and sepshk = 1, computer to display earliest of hypotnsdt/hypotnstm - 6 hrs) to (hypotnsdt/hypotnstm + 3 hours or sepshkdt/sepshktm - 6 hours to sepshkdt/sepshktm + 3 hours) were crystalloid fluids initiated?

1. Yes

2. No

4. There is documentation the patient has an implanted Ventricular Assist Device (VAD)98. The patient or authorized patient advocate refused IV fluids.

### TARGVOL

Is there documentation the target ordered volume of crystalloid fluids (computer to display crystlvol) initiated on (computer to display crystldt at crystltm) was completely infused?

1. Yes

2. No

# **CRYSTLDT / CRYSTLTM**

Enter the earliest date and time on which crystalloid fluids were initiated.

#### PERSHYPO

During the time frame from (computer display crystlend) to (computer to display crystlend + 1 hour) is there physician/APN/PA documentation that persistent hypotension or new onset of hypotension was present?

Criteria for determining persistent or new onset of hypotension:

• Two hypotensive blood pressure readings at different times within specified timeframe

- o systolic blood pressures <90, or
- o mean arterial pressures (MAP), <65 or
- o a decrease in systolic BP by >40 mm/Hg

1. Yes

2. No or Unable to determine

3. No, the patient was not assessed for persistent hypotension or new onset of hypotension within one hour after the conclusion of crystalloid fluid administration at the target ordered volume.

4. Not applicable - Crystalloid fluids were administered but at a volume less than the target ordered volume
