

**Document Links:**  
[HBPC Instrument](#)

**REVSTAT**  
 REVIEW STATUS (not abstracted)  
 0. Abstraction has not begun  
 2. Abstraction completed w/o errors  
 3. Cohort validation failure (exclusion)  
 4. Record contains missing data  
 5. Administrative Exclusion

**COHORT**  
 69 – Home Based Primary Care

**HCSTATUS** (HBPC)  
 Counting from the most recent HBPC encounter within the study interval, enter the patient's status in regard to HBPC admission:  
 2. HBPC admission greater than or equal to 30 days but less than or equal to 1 year  
 3. HBPC admission greater than one year from the most recent HBPC encounter.

**INPTADM** (HBPC)  
 During the time frame from (computer display admisd to admisd + 30 days), did the record document the patient was admitted to an acute or non-acute inpatient facility?  
 1. Yes  
 2. No

**ENVOXY** (HBPC)  
 Was the patient oxygen dependent?  
 1. Yes  
 2. No

**ASESOXY2** (HBPC)  
 During the time frame from (computer to display admisd - 30 days to admisd + 30 days) at a face-to-face encounter OR a CVT encounter **if rural location**, was a home oxygen safety risk assessment documented by a HBPC team member to include all of the following components?

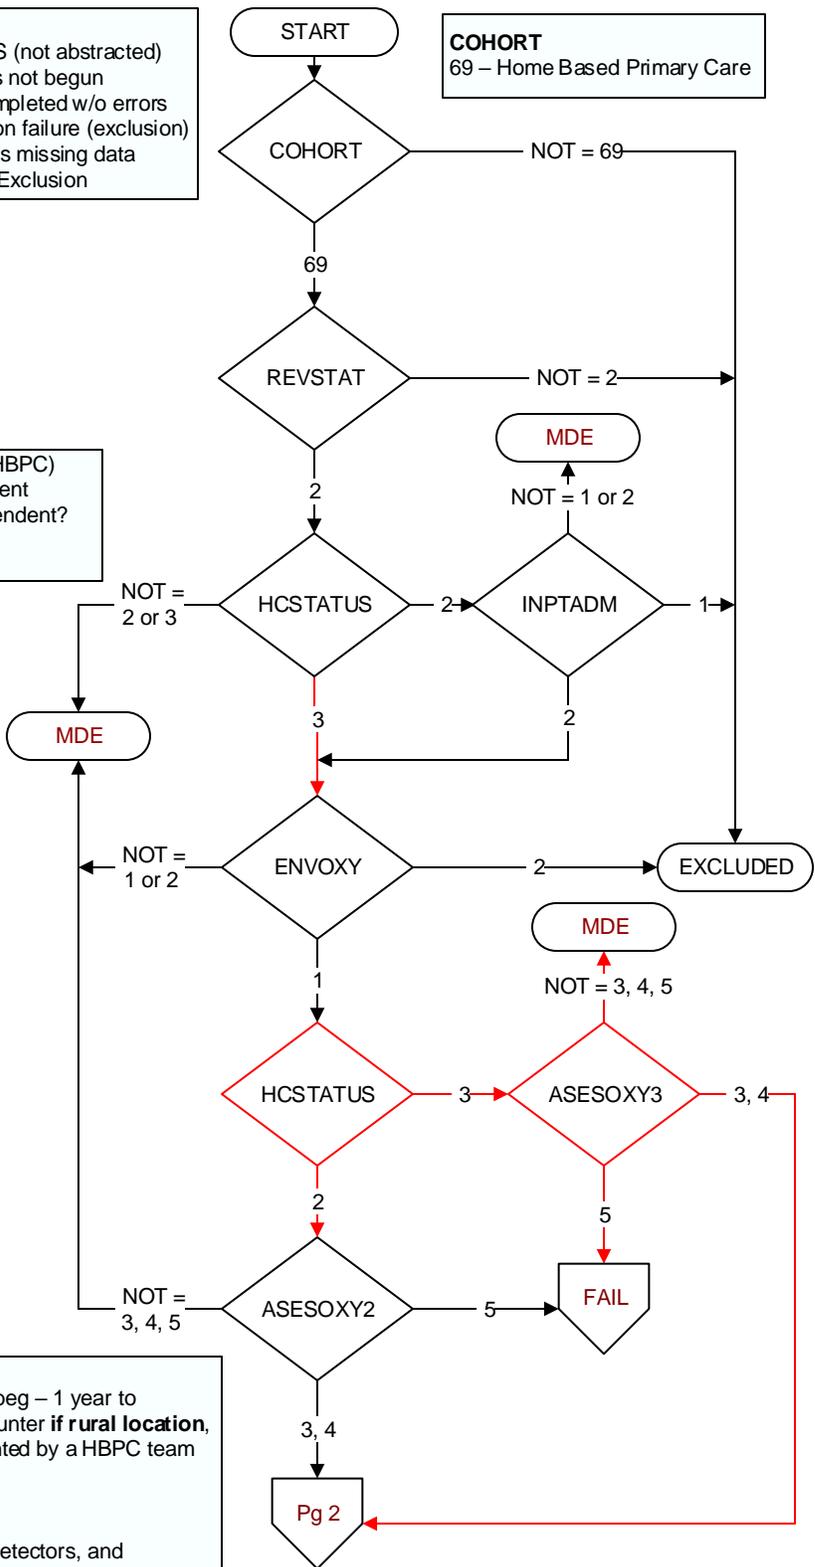

- Whether there are smoking materials in the home,
- Whether or not the home has functioning smoke detectors, and
- Whether there are other fire safety risks in the home, such as the potential for open flames

3. Yes, a home oxygen safety risk assessment including all components above was documented by a HBPC team member during a **face-to-face encounter** in the patient's home  
 4. Yes, a home oxygen safety risk assessment including all components above was documented by a HBPC team member during a **CVT encounter if rural location**.  
 5. No home oxygen safety risk assessment was documented by a HBPC team member during a face-to-face or CVT encounter

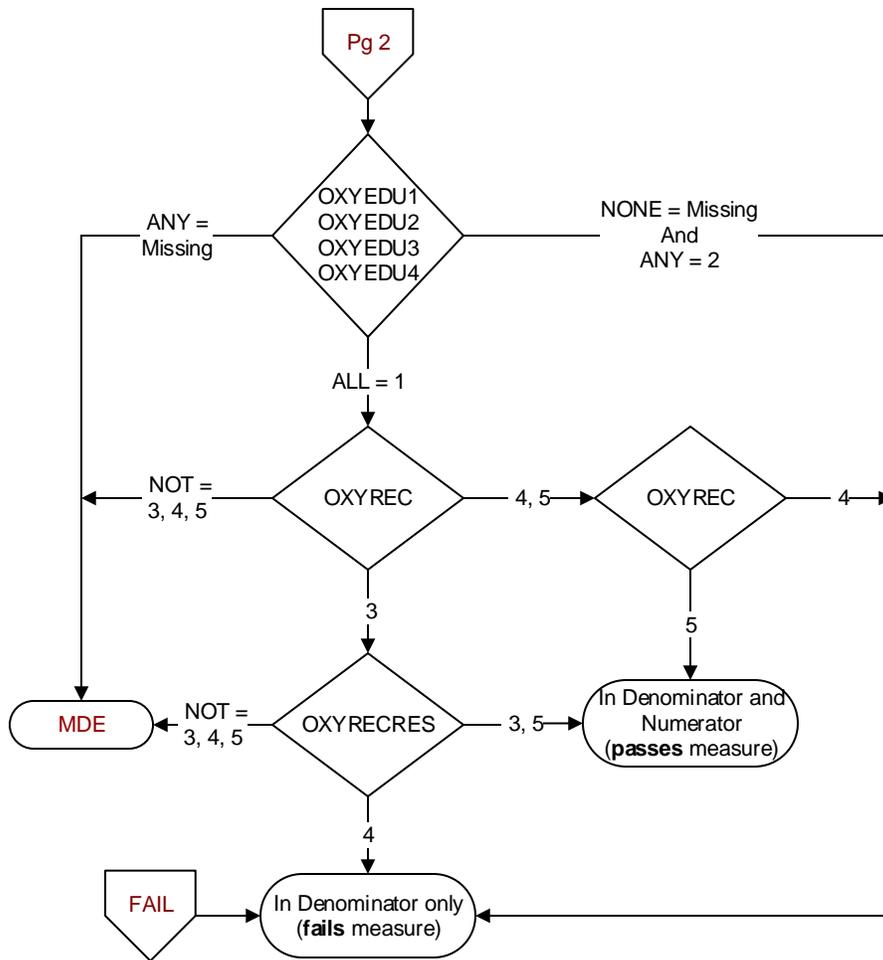

**ASESOXY3** (HBPC)  
 During the time frame from (computer to display stdybeg - 1 year to stdyend) at a face-to-face encounter OR a CVT encounter **if rural location**, was a home oxygen safety risk assessment documented by a HBPC team member to include all of the following components?

- Whether there are smoking materials in the home,
- Whether or not the home has functioning smoke detectors, and
- Whether there are other fire safety risks in the home, such as the potential for open flames

3. Yes, a home oxygen safety risk assessment including all components above was documented by a HBPC team member during a face-to-face encounter in the patient's home  
 4. Yes, a home oxygen safety risk assessment including all components above was documented by a HBPC team member during a CVT encounter if rural location.  
 5. No home oxygen safety risk assessment was documented by a HBPC team member during a face-to-face or CVT encounter

**MDE = Missing or Invalid Data Exclusion (data error)**

During the HBPC team face-to-face or CVT encounter on (computer to display asesoxydt), did the HBPC team member inform and educate the patient/caregiver on home oxygen safety to include:

- OXYEDU1.** The findings of the oxygen safety risk assessment
  1. Yes
  2. No
- OXYEDU2.** The causes of fire
  1. Yes
  2. No
- OXYEDU3.** Fire risks for neighboring residences and buildings
  1. Yes
  2. No
- OXYEDU4.** Precautions that can prevent fire-related injuries
  1. Yes
  2. No

**OXYREC (HBPC)**

Did a HBPC team member document recommended interventions to address identified oxygen safety risk(s)?

Examples include, but are not limited to:

- Replace non-functioning smoke detector
- Family to post “no smoking” signs on the front exterior door
- Veteran educated to not use oxygen near open flames

3. Yes
4. No
5. HBPC team member documented that NO oxygen safety risks were identified

**OXYRECRES (HBPC)**

Following documentation of the home oxygen safety/risk care plan or intervention, was response to the care plan/ intervention evaluated by a HBPC team member?

Examples include, but are not limited to:

- Smoke detector is now functioning
- “No smoking” signs are posted at front exterior door
- No further evidence of candle usage observed at follow-up visit

3. Yes
4. No
5. No HBPC visit between home oxygen care plan/intervention and study end date
