REVSTAT
 REVIEW STATUS (not abstracted)
 0. Abstraction has not begun
 2. Abstraction completed w/o errors
 3. TVG failure (exclusion)
 4. Record contains missing data
 5. Administrative exclusion

HOSPICE
 During the period from (computer to display stdybeg – 1 year to stdyend), is there documentation in the medical record the patient is enrolled in a VHA or community-based hospice program?
 1. Yes
 2. No

PALLCARE
 During the period from (computer to display stdybeg – 1 year to stdyend), is there documentation in the medical record the patient is enrolled in a VHA or community-based palliative care program?
 1. Yes
 2. No

TERMILLNES
 During the period from (computer to display stdybeg – 1 year to stdyend), is one of the following documented in the medical record?
 • Provider documentation that the patient is terminally ill or has a terminal illness
 • Patient's life expectancy is less than six (6) months on the problem list or in health factors
 1. Yes
 2. No

ABFOBTDT
 Computer to pre-fill the date the abnormal FOBT/FIT result requiring action was reported.

NONVAFOBT
 Is there documentation that the FOBT/FIT was performed outside of VHA?
 1. Yes
 2. No

ABFOBTADM
 During the timeframe from (computer display abfobt dt to abfobt dt +7 days), was the patient admitted to an inpatient setting?
 1. Yes
 2. No

FOBTNOACT
 During the timeframe from (computer display abfobt dt to abfobt dt + 7 days), did the ordering provider document the abnormal FOBT/FIT result did not require action?
 1. Yes
 2. No

MDE = Missing or Invalid Data Exclusion (data error)

CTR25 - fy2026q2 – % of Abnormal Test Results that Require Action Communicated within 30 days of test report

AFOBTCOM

During the timeframe from (computer display abfobtdt to abfobtdt + 30 days), was the abnormal FOBT/FIT result communicated to the patient by one of the following methods?

- Face to face encounter – Documentation of discussion of results within patient visit in the progress note is required.
- Clinical Video Telehealth (CVT) refers to real time clinic based video encounter between the patient and provider. Documentation of discussion of results within the CVT encounter in the progress note is required.
- Telephone encounter - Documentation of discussion of results within telephone visit note is required.
- Standard or certified letter – Certified letters are no longer required for abnormal results that require action.
- Secure messaging is a confidential message functionality of My HealtheVet similar to email between patient and provider for non-urgent matters.

1. Yes
2. No

ABAFPDT

Computer to pre-fill the date the abnormal AFP result requiring action was reported.

NONVAFP

Is there documentation that the alpha-fetoprotein (AFP) test was performed outside of VHA?
 1. Yes
 2. No

ADMABAFP

During the timeframe from (computer display abafpdt to abafpdt +7 days), was the patient admitted to an inpatient setting?

1. Yes
2. No

AFPNOACT

During the timeframe from (computer display abafpdt to abafpdt + 7 days), did the ordering provider document the abnormal AFP result did not require action?

1. Yes
2. No

ABAFPCOM

During the timeframe from (computer display abafpdt to abafpdt + 30 days), was the abnormal AFP result communicated to the patient by one of the following methods?

- Face to face encounter – Documentation of discussion of results within patient visit in the progress note is required.
- Clinical Video Telehealth (CVT) refers to real time clinic based video encounter between the patient and provider. Documentation of discussion of results within the CVT encounter in the progress note is required.
- Telephone encounter - Documentation of discussion of results within telephone visit note is required.
- Standard or certified letter – Certified letters are no longer required for abnormal results that require action.
- Secure messaging is a confidential message functionality of My HealtheVet similar to email between patient and provider for non-urgent matters.

1. Yes
2. No

CTR25 - fy2026q2 – % of Abnormal Test Results that Require Action Communicated within 30 days of test report

ABPSADT
 Computer to pre-fill the date the abnormal PSA result requiring action was reported.

NONVAPSA
 Is there documentation that the prostate specific antigen (PSA) test was performed outside of VHA?
 1. Yes
 2. No

ADMABPSA
 During the timeframe from (computer display abpsadt to abpsadt +7 days), was the patient admitted to an inpatient setting?
 1. Yes
 2. No

PSANOACT
 During the timeframe from (computer display abpsadt to abpsadt + 7 days), did the ordering provider document the abnormal PSA result did not require action?
 1. Yes
 2. No

ABPSACOM
 During the timeframe from (computer display abpsadt to abpsadt + 30 days), was the abnormal PSA result communicated to the patient by one of the following methods?
 • Face to face encounter – Documentation of discussion of results within patient visit in the progress note is required.
 • Clinical Video Telehealth (CVT) refers to real time clinic based video encounter between the patient and provider. Documentation of discussion of results within the CVT encounter in the progress note is required.
 • Telephone encounter- Documentation of discussion of results within telephone visit note is required.
 • Standard or certified letter – Certified letters are no longer required for abnormal results that require action.
 • Secure messaging is a confidential message functionality of My HealtheVet similar to email between patient and provider for non-urgent matters.
 1. Yes
 2. No

CTR25 - fy2026q2 – % of Abnormal Test Results that Require Action Communicated within 30 days of test report

ABMAMDT
Computer to pre-fill the date the abnormal mammogram result requiring action was reported.

NONVAMAM
Is there documentation that the mammogram was performed outside of VHA?
1. Yes
2. No

CERNER
System flag indicating the facility uses the Oracle Health eHR

Pg 5 ← 1, 2, 6, 99

BIRADSCR
Enter the BI-RADS category score documented in the mammogram report on (computer display abmamdt).
0. 0
1. 1
2. 2
3. 3
4. 4
5. 5
6. 6
99. BI-RADS category score not documented

ADMAM
During the timeframe from (computer display abmamdt to abmamdt +7 days), was the patient admitted to an inpatient setting?
1. Yes
2. No

MAMNOACT
During the timeframe from (computer display abmamdt to abmamdt + 7 days), did the ordering provider document the abnormal mammogram result did not require action?
1. Yes
2. No

AMAMCOM
During the timeframe from (computer display abmamdt to abmamdt + 30 days), was the abnormal mammogram result communicated to the patient by one of the following methods?
• Face to face encounter – Documentation of discussion of results within patient visit in the progress note is required.
• Clinical Video Telehealth (CVT) refers to real time clinic based video encounter between the patient and provider. Documentation of discussion of results within the CVT encounter in the progress note is required.
• Telephone encounter - Documentation of discussion of results within telephone visit note is required.
• Standard or certified letter – Certified letters are no longer required for abnormal results that require action.
• Secure messaging is a confidential message functionality of My HealtheVet similar to email between patient and provider for non-urgent matters.
1. Yes
2. No

CTR25 - fy2026q2 – % of Abnormal Test Results that Require Action Communicated within 30 days of test report

ABNCTSDT
 Computer to pre-fill the result of the abnormal low dose CT lung scan reported during the study period.

CTABNVAL
 Computer to pre-fill the result of the abnormal low dose CT lung scan reported during the study period.

VCTABNRSLT
 Is the pre-filled low dose CT lung scan result the same as the LUNG-RADS code documented in the record for the low dose CT scan lung report on (computer display abnctsdt)?
 1. Yes
 2. No

LUNGRADS
 Enter the LUNG-RADS code documented in the low dose CT lung scan report on (computer display abnctsdt).

NONVACTS
 Is there documentation that the low dose CT lung scan was performed outside of VHA?
 1. Yes
 2. No

ADMABCTS
 During the timeframe from (computer display abnctsdt to abnctsdt +7 days), was the patient admitted to an inpatient setting?
 1. Yes
 2. No

CTR25 - fy2026q2 – % of Abnormal Test Results that Require Action Communicated within 30 days of test report

ADMABCTS
 During the timeframe from (computer display abnctsd to abnctsd +7 days), was the patient admitted to an inpatient setting?
 1. Yes
 2. No

CTSNOACT
 During the timeframe from (computer display abnctsd to abnctsd + 7 days), did the ordering provider document the abnormal low dose CT lung scan result did not require action?
 1. Yes
 2. No

CTSNOACT
 During the timeframe from (computer display abnctsd to abnctsd + 30 days), was the abnormal low dose CT lung scan result communicated to the patient by one of the following methods?

- Face to face encounter – Documentation of discussion of results within patient visit in the progress note is required.
- Clinical Video Telehealth (CVT) refers to real time clinic based video encounter between the patient and provider. Documentation of discussion of results within the CVT encounter in the progress note is required.
- Telephone encounter - Documentation of discussion of results within telephone visit note is required.
- Standard or certified letter – Certified letters are no longer required for abnormal results that require action.
- Secure messaging is a confidential message functionality of My HealtheVet similar to email between patient and provider for non-urgent matters.

1. Yes
 2. No

CTR25 - fy2026q2 – % of Abnormal Test Results that Require Action Communicated within 30 days of test report

ABHIVDT
Computer to pre-fill the date the abnormal HIV result requiring action was reported.

VCONFHIV
On (computer to display abhivdt) was a human immunodeficiency virus (HIV) confirmatory test result reported?
Examples of HIV confirmatory tests include, but are not limited to:

- Western blot
- Indirect fluorescent antibody (IFA)
- HIV Viral Load
- HIV PCR
- HIV RNA
- HIV NAAT

1. Yes
2. No

CHIVRES
What was the result of the confirmatory test for HIV?

1. Positive or reactive
2. Negative or nonreactive
3. Indeterminate
95. Not applicable

VHIVSCR
On (computer to display abhivdt) was a screening test for HIV performed?

1. Yes
2. No

NEWHIVDX
Does provider documentation indicate this patient was newly diagnosed with HIV?

1. Yes
2. No
99. Unable to determine if HIV was a new diagnosis for this patient

NONVAHIV
Is there documentation that the human immunodeficiency (HIV) test was performed outside of VHA?

1. Yes
2. No

ADMABHIV
During the timeframe from (computer display abhivdt to abhivdt +7 days), was the patient admitted to an inpatient setting?

1. Yes
2. No

CTR25 - fy2026q2 – % of Abnormal Test Results that Require Action Communicated within 30 days of test report

HIVNOACT
 During the timeframe from (computer display abhivdt to abhivdt + 7 days), did the ordering provider document the abnormal HIV result did not require action?
 1. Yes
 2. No

ABHIVCOM
 During the timeframe from (computer display abhivdt to abhivdt + 30 days), was the abnormal HIV result communicated to the patient by one of the following methods?

- Face to face encounter – Documentation of discussion of results within patient visit in the progress note is required.
- Clinical Video Telehealth (CVT) refers to real time clinic based video encounter between the patient and provider. Documentation of discussion of results within the CVT encounter in the progress note is required.
- Telephone encounter - Documentation of discussion of results within telephone visit note is required.
- Standard or certified letter – Certified letters are no longer required for abnormal results that require action.
- Secure messaging is a confidential message functionality of My HealtheVet similar to email between patient and provider for non-urgent matters.

1. Yes
 2. No
