[HBPC Instrument](#)

REVSTAT

- REVIEW STATUS (not abstracted)
0. Abstraction has not begun
 2. Abstraction completed w/o errors
 3. Cohort validation failure (exclusion)
 4. Record contains missing data
 5. Administrative Exclusion

COHORT

69 – Home Based Primary Care

HCSTATUS (HBPC)

Counting from the most recent HBPC encounter within the study interval, enter the patient's status in regard to HBPC admission:

2. HBPC admission greater than or equal to 30 days but less than or equal to 1 year
3. HBPC admission greater than one year from the most recent HBPC encounter.

INPTADM (HBPC)

During the time frame from (computer display admidst to admidst + 30 days), did the record document the patient was admitted to an acute or non-acute inpatient facility?

1. Yes
2. No

ENVOXY (HBPC)

Was the patient oxygen dependent?

1. Yes
2. No

ASESOXY2 (HBPC)

During the time frame from (computer to display admidst – 30 days to admidst + 30 days) at a face-to-face encounter OR a CVT encounter **if rural location**, was a home oxygen safety risk assessment documented by a HBPC team member to include all of the following components?

- Whether there are smoking materials in the home,
- Whether or not the home has functioning smoke detectors, and
- Whether there are other fire safety risks in the home, such as the potential for open flames

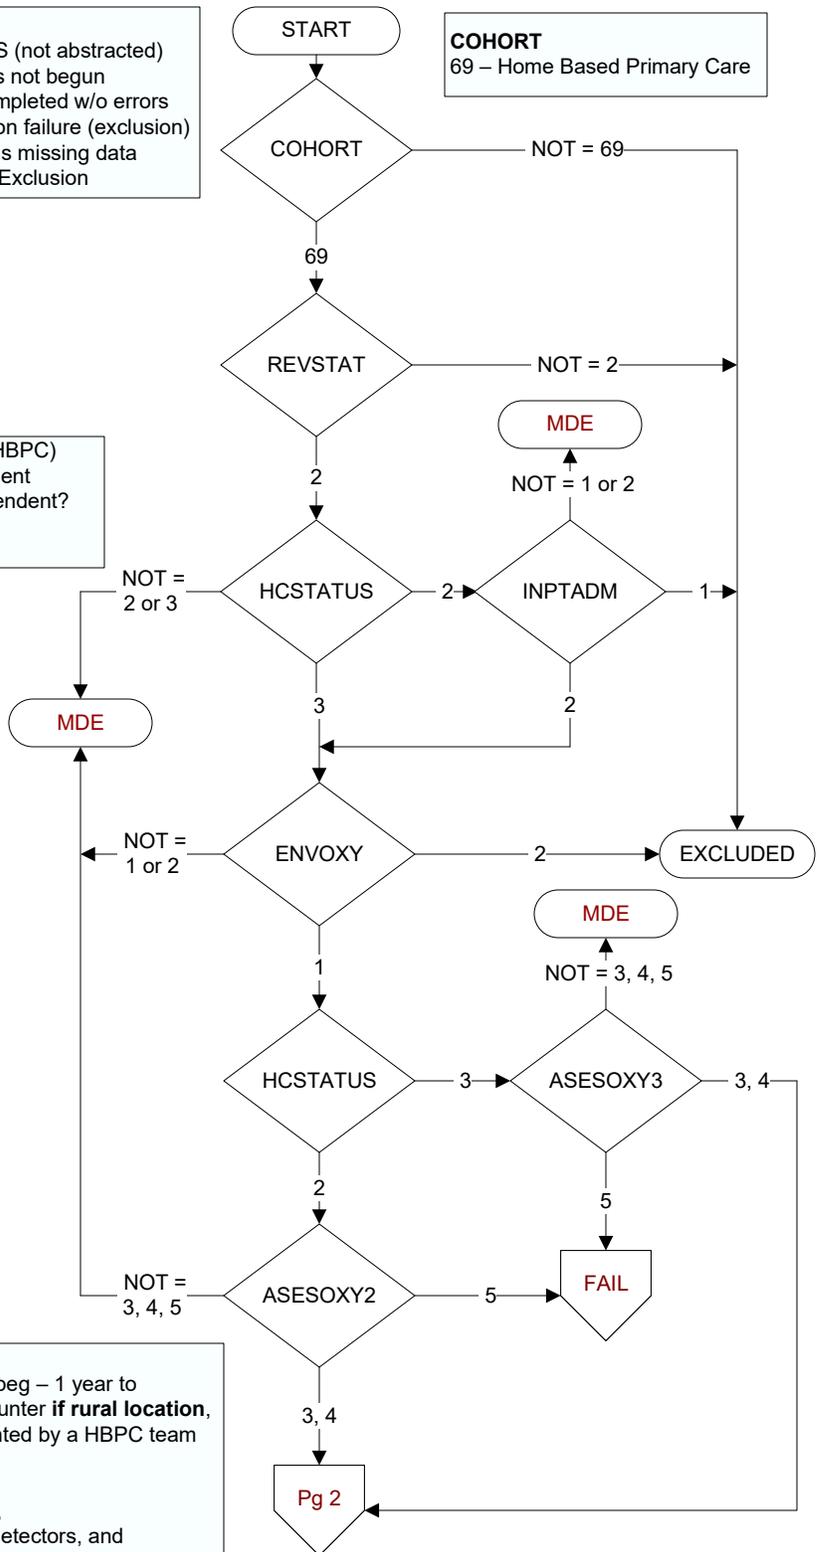

3. Yes, a home oxygen safety risk assessment including all components above was documented by a HBPC team member during a **face-to-face encounter** in the patient's home
4. Yes, a home oxygen safety risk assessment including all components above was documented by a HBPC team member during a **CVT encounter if rural location**.
5. No home oxygen safety risk assessment was documented by a HBPC team member during a face-to-face or CVT encounter

ASESOXY3 (HBPC)

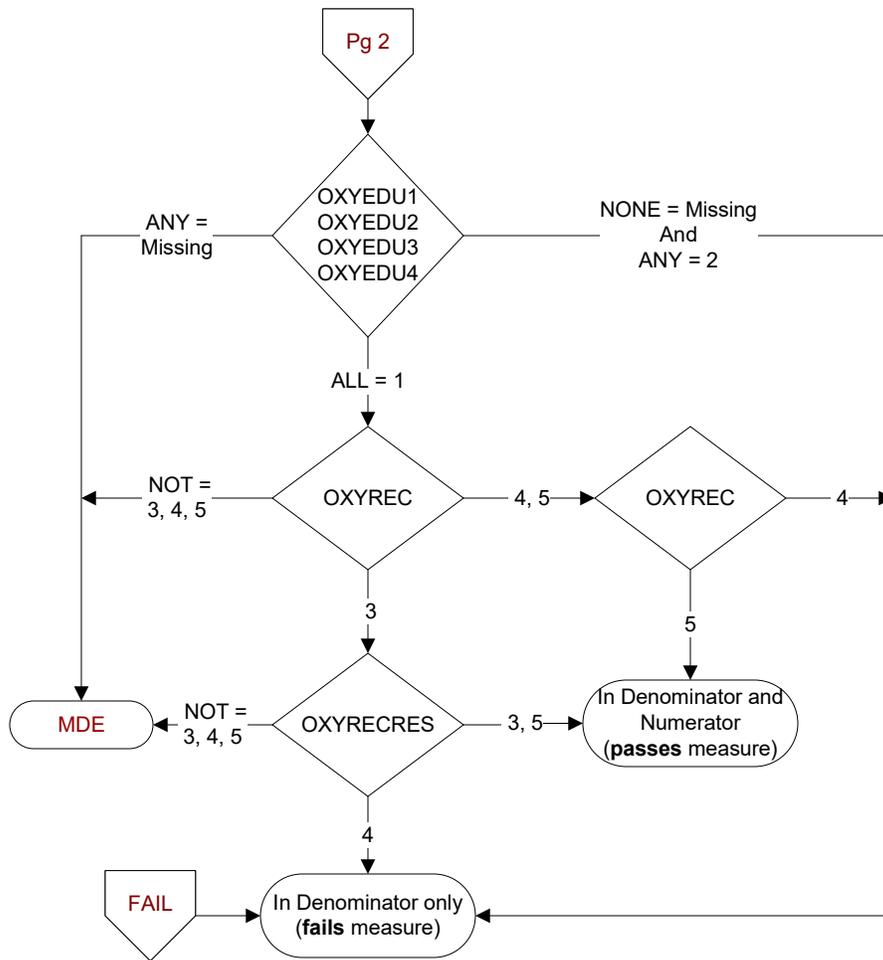

During the time frame from (computer to display stdybeg – 1 year to stdyend) at a face-to-face encounter OR a CVT encounter **if rural location**, was a home oxygen safety risk assessment documented by a HBPC team member to include all of the following components?

- Whether there are smoking materials in the home,
- Whether or not the home has functioning smoke detectors, and
- Whether there are other fire safety risks in the home, such as the potential for open flames

3. Yes, a home oxygen safety risk assessment including all components above was documented by a HBPC team member during a face-to-face encounter in the patient's home
4. Yes, a home oxygen safety risk assessment including all components above was documented by a HBPC team member during a CVT encounter if rural location.
5. No home oxygen safety risk assessment was documented by a HBPC team member during a face-to-face or CVT encounter

MDE = Missing or Invalid Data Exclusion (data error)

During the HBPC team face-to-face or CVT encounter on (computer to display asesoxydt), did the HBPC team member inform and educate the patient/caregiver on home oxygen safety to include:

OXYEDU1. The findings of the oxygen safety risk assessment

1. Yes

2. No

OXYEDU2. The causes of fire

1. Yes

2. No

OXYEDU3. Fire risks for neighboring residences and buildings

1. Yes

2. No

OXYEDU4. Precautions that can prevent fire-related injuries

1. Yes

2. No

OXYREC (HBPC)

Did a HBPC team member document recommended interventions to address identified oxygen safety risk(s)?

Examples include, but are not limited to:

- Replace non-functioning smoke detector
- Family to post “no smoking” signs on the front exterior door
- Veteran educated to not use oxygen near open flames

3. Yes

4. No

5. HBPC team member documented that NO oxygen safety risks were identified

OXYRECRES (HBPC)

Following documentation of the home oxygen safety/risk care plan or intervention, was response to the care plan/ intervention evaluated by a HBPC team member?

Examples include, but are not limited to:

- Smoke detector is now functioning
- “No smoking” signs are posted at front exterior door
- No further evidence of candle usage observed at follow-up visit

3. Yes

4. No

5. No HBPC visit between home oxygen care plan/intervention and study end date
